

Segregation effects in a granular free-surface flow

Nicolas Macé

31 juillet 2013

Table des matières

1	General presentation : <i>What is a granular material ?</i>	2
2	Our problem : <i>Segregation effect in a granular bidisperse free-surface flow going down a slope.</i>	3
3	Results and discussion : <i>2D and 3D simulation and analytical approach</i>	4
4	Personal achievements and conclusion	5

Chapitre 1

General presentation

What is a granular material ?

Chapitre 2

Our problem

Segregation effect in a granular bidisperse free-surface flow going down a slope.

Chapitre 3

Results and discussion

2D and 3D simulation and analytical approach

Chapitre 4

Personal achievements and conclusion
